Holiday Lunch of Appreciation

Our Packaging Consultants came together to say thank you to the entire Acme Corrugated Box team — from production to customer service, logistics to leadership. What a fun way to show gratitude for the hard work, dedication, and teamwork that drive our success all year long.

**5 Years Later -
Acme's Major
Expansion**

Before & After Acme's Transformation Project

Five years ago, we kicked off the most ambitious expansion in Acme's history. Through supply chain challenges, a pandemic, and countless moving parts, the vision became reality.

Holiday Lunch of Appreciation

Our Sales Team was proud to host Acme's annual Holiday Lunch of Appreciation — a tradition led by our Packaging Consultants to recognize the incredible work of the entire Acme Corrugated Box team.

From the production floor to customer service, logistics to leadership, this lunch was a heartfelt thank you to everyone who helps power our success year-round. Great food, great company — and a great reminder of the teamwork that defines Acme.

Rutgers Packaging Engineering Career Night

In October, the Acme Corrugated Box team had the pleasure of attending Rutgers Packaging Engineering Career Night — an event that brings together industry professionals, research faculty, and the next generation of packaging innovators.

It was inspiring to meet so many bright, motivated students who are shaping the future of sustainable and intelligent packaging.

Acme Updates

Working hard, giving back, and some fun along the way.

SafeStart Module One Training

Our team completed SafeStart Module 1—a training focused on recognizing the states that lead to human error, and the tools we can use to avoid them. Why do we do it? Because we have a passion for safety. It's Fundamental #1 at Acme—and it's #1 for a reason. No customer, no order, and no box is more important than making sure every team member goes home the same way they arrived.

Thanks to our trainer, Deric Ostrum, and to everyone who participated—we're looking forward to Module 2 in January 2026.

Celebrating Manufacturing Day

Acme Corrugated Box was proud to be a sponsor and exhibitor at NEIRC Manufacturing Day 2025 on October 3rd — an event dedicated to showcasing the strength, innovation, and talent within our region's manufacturing community.

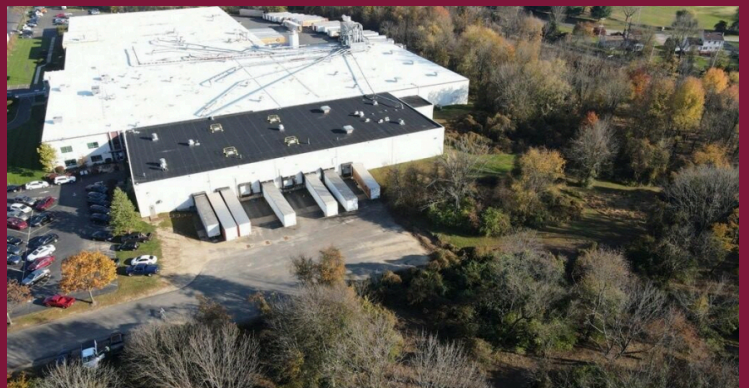

We're honored to stand alongside so many great organizations driving the future of manufacturing forward. Events like this remind us that collaboration and innovation are at the heart of everything we build.

Dec Blog Post: “Five Years of Progress: Reflecting on Acme’s Most Ambitious Expansion”

We’re proud to share the story behind the largest expansion in Acme’s history — a five-year journey that increased our facility from 209,000 to 304,000 sq ft and transformed how we operate. Highlights include a state-of-the-art corrugator, a fully automated Hi-Rack WIP system, and expanded converting capacity with new Isowa Falcon lines — all designed to boost efficiency, reliability, and future readiness.

Packaging the Future: How Automation Powers Corrugated Success

Q4 WEBINAR RECAP FEATURING JEFF BITTNER

Acme recently hosted a webinar, “Packaging the Future: How Automation Powers Corrugated Success,” featuring Jeff Bittner and Jeff Lucash. The session explored how automation is transforming Acme’s operations — from high-speed corrugators and data-driven scheduling to advanced converting lines and automated WIP systems. Attendees got an inside look at how these investments are boosting efficiency, consistency, and long-term scalability, with a glimpse at what’s next for 2026 and beyond.
